## How to convert

1. Hours 13 to 23: subtract 12 and add PM.
2. 12xx is PM. 00xx is the 12 AM hour.
3. Minutes don't change.

Overnight: if out is smaller than in, add 24 hours to the out time first.

0000 starts the day. Some systems print 2400 for the same moment at the end of the day.
